

Where to turn the water on and off at the Barnyard Buzzards Field

There are two ways to access the faucet at the field. The first approach is from the main gate area.

1. Go through the fence and head towards the trailer. As you are facing the trailer, on the right side you should see a yellow bucket. Next to the bucket is the water faucet. There is a two way valves attached to the faucet. Turn the timer to 2 to 3 hours to turn the water on. Turn the timer to off turns the water off. Also, please note that there is a ball valve at the end of the hose on the field. You can use this valve to move the hose from one sprinkler set to the next.

2. The second approach is from behind the barn and through the metal gate, up the hill to the trailer and then the faucet. There is an electric fence that you need to duck under. The fence is the white ribbon that is strung across the fence opening. Be sure to **USE CAUTION** when going under the **electric fence ribbon**.
